

FAITH KAVATA KAMUTI

SOFTWARE ENGINEER

kavatafaith412@gmail.com | 0742156134 | <https://kavataf.github.io/>

Professional Summary

Software Developer with hands-on experience building responsive web and mobile applications using Flutter, PHP, JavaScript, React, and Node.js. Experienced in developing user-facing features, integrating third-party APIs and payment services, working with PostgreSQL and MySQL, and troubleshooting and testing applications. Strong foundation in Data Structures and Algorithms, software development principles, and Git-based development workflows. Skilled at translating requirements into practical technical solutions and building reliable, maintainable applications through project-based development. Eager to contribute to a collaborative engineering team while continuing to develop production-level software engineering skills.

Skills

Frontend: React, JavaScript, HTML, CSS, Bootstrap

Backend: Node.js, Express.js, Python, PHP

Databases: PostgreSQL, MySQL, Maria DB, MongoDB, Supabase

Mobile & Cross-platform: Flutter, Dart

Development Tools: Git, GitHub, Postman, VS Code, Android Studio

APIs & Integrations: REST APIs, third-party API integration, payment gateways, enterprise systems

Security: Authentication, JWT, authorization, audit logging, password hashing

Delivery Practices: Requirements gathering, responsive design, performance optimization, agile sprint collaboration, Client communication, Technical documentation, Testing and debugging

Work Experience

COMPUTER APPLICATIONS INSTRUCTOR

Feb 2026 – Apr 2026

WEMA Group

Makueni

- Guided 5 hands-on lab sessions weekly to build student confidence with Microsoft Word, Excel, PowerPoint, and internet fundamentals.
- Developed lesson plans, practical exercises, and instructional materials to structure clear, hands-on computer learning.
- Assessed student progress through practical tasks and reinforced digital literacy and computer proficiency during instruction.
- Provided technical support and troubleshooting during practical sessions to keep classes moving smoothly.
- Maintain a positive, engaging learning environment that encourages student participation and practical computer skill development.

FULL STACK WEB DEVELOPER

Jan 2023 – Aug 2024

FREELANCE

Remote

- Track 5 bugs fixed per sprint while balancing client requests, and release updates across active web projects.
- Build responsive websites and web applications with HTML, CSS, JavaScript, and PHP for individuals and small businesses.
- Translate client requirements into dynamic applications using Flutter, Node.js, and MySQL for stronger functionality.
- Implemented authentication, authorization, role-based access control and secure user-management workflows.
- Coordinate remotely with clients to gather requirements, share progress updates, and deliver work on schedule.
- Manage multiple projects simultaneously while using Git, Github, version control and collaborative development.
- Tested, debugged and optimized applications, resolving defects and improving performance and reliability.
- Prepared technical documentation and maintained source code for application handover and future maintenance.

SOFTWARE ENGINEERING TRAINEE

May 2024 – Aug 2024

ICT DEPARTMENT, COUNTY GOVERNMENT

Makueni County

- Managed project timelines and budgets while coordinating delivery with stakeholders and software developers.
- Designed intuitive, visually appealing interfaces using HTML & CSS, responsive web design, and accessibility standards.
- Integrated third-party APIs and extended web application functionality through JavaScript and Node.js development.
- Built new features and modified existing software using OOP principles, design patterns, and reusable components.
- Used Git for code management, collaboration, and project history tracking while contributing to maintainable code libraries.

SELECTED PROJECT

Smart Hospital Mobile System <In Progress>

Flutter | Dart | Node.js | Express.js | Mongo DB | REST API

- Developing a cross-platform mobile application to streamline patient appointments, medical information, notifications, and communication with healthcare providers.
- Designing role-based workflows for patients, doctors/nurses, and administrators.
- Implementing a secure authentication system with user registration, login, password reset, and email verification.
- Developing the backend using Node.js, Express.js, Mongo DB, and RESTful APIs to support mobile application functionality.
- Designing the application UI in Figma and implementing reusable, responsive Flutter components following a structured design system.

Chama Online Management System (COMS)

PHP | MySQL | Bootstrap | JavaScript | PHPMailer | Paystack | Dompdf | Chart.js

- Developed a web-based Chama Management System for managing members, contributions, loans, and financial records.
- Implemented role-based authentication and authorization for System administrators and members, including secure password hashing and email verification.
- Integrated Paystack for online payment processing and PHPMailer for email notifications and authentication.
- Developed an administrative dashboard with Chart.js to visualize member contributions, loans and financial activities.
- Generated downloadable reports and documents using Dompdf, while building responsive interfaces with PHP, Bootstrap, JavaScript, and MySQL/Maria DB.

EDUCATION

Bachelor of Science (Honors): Computer Science

Nov 2025

Egerton University

- Second Class Honors
- Relevant Coursework: Data Structures, Software Engineering, Artificial Intelligence, Cyber security, Information Technology

High School Diploma

April 2021

Ukia Girls Secondary School

GRADE: A-

CERTIFICATIONS

The complete Flutter Development Boot camp with Dart
